Price:

3350 PLN + 23%VAT

Date:

25-26.03.2019

Venue:

Lord Hotel, Warsaw (Al. Krakowska 218)

Description:

This advanced training course is designed to improve your chances of passing the PMI-ACP exam.

There is an increasing demand for professionals with the PMI-ACP certification all over the world as organizations are increasingly adding Agile Methods to their portfolio of Project Management Approaches for the execution of projects.

The course builds on the candidates' practical experience of Agile in the workplace to equip them with the broad range of knowledge and skills required for the PMI-ACP exam. It will follow the PMI requirements and reference the suggested reading list, but will not be limited to those areas.

Within the profession and discipline of project management, Agile continues to develop as a significant and important aspect of bringing change to an organization. Where the products of change must be delivered to the business "on time", Agile is often the chosen methodology.

In addition to equipping candidates for the PMI-ACP examination, this course will also support candidates in taking a more informed and effective role in Agile projects. It will also enable them to take a significant role in encouraging and enabling the organization to become or develop as an Agile environment.

The training is delivered in English without translation.

Who the course is for:

This course is designed for anyone who wants to become PMI® Agile certified and currently working on Agile-based projects and has wider project management experience.

Anyone with a working knowledge of Agile from senior management to product developers will benefit from this course.

Choose this course if you would like to get the knowledge and tools to pass PMI-ACP exam on your first try!

Course objectives:

By the end of this course, you will be able to:

- Appreciate the wider aspects of Agile project management tools and techniques
- Understand terms, concepts, tasks, techniques and best practices when studying the Tools and Techniques and Knowledge and Skills for the different Domain areas.
- Practice taking exam questions, giving you confidence in your understanding of the concepts and approach used in the PMI-ACP exam
